Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/580,179	Applicant(s) GELLRICH ET AL.
	Examiner Christina Riddle	Art Unit 2851

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on ____.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 39-99 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) Claim(s) ____ is/are allowed.
- 6) Claim(s) ____ is/are rejected.
- 7) Claim(s) ____ is/are objected to.
- 8) Claim(s) 39-99 are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on ____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. ____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/SE/08)
Paper No(s)/Mail Date ____
- 4) Interview Summary (PTO-413)
Paper No(s)/Mail Date ____
- 5) Notice of Informal Patent Application
- 6) Other: ____

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 39, 40, 42, 46, 55, 61, and 72, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element wherein *a seal or gasket is arranged between the optical element and the reinforcing element*.

Group II, claim(s) 39, 41, 43, 44, and 47, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element wherein *the reinforcing element and the optical element are composed of the same material*.

Group III, claim(s) 39, 45, 48-53, and 87-91, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element wherein *the optical element and the reinforcing element are connected to one another by a wrung connection*.

Group IV, claim(s) 39, 54 and 56-59, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element wherein *the optical element and the reinforcing element are bonded together*.

Group V, claim(s) 39, 60, 62, 66, and 68-70, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element wherein *a seal or gasket is arranged between the mount and the reinforcing element*.

Group VI, claim(s) 39, 63, and 64, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element

between the mount and the optical element wherein *the reinforcing element is held inside the mount by an isostatic bearing*.

Group VII, claim(s) 39, 65, and 67, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element wherein *the reinforcing element is fitted on the mount by a plurality of fastening elements*.

Group VIII, claim(s) 39 and 71, drawn to a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element wherein *the optical element is designed as a terminating element*.

Group IX, claim(s) 73-85, drawn to *an objective having an optical element and having a holding device for an optical element* in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element.

Group X, claim(s) 86 and 92, drawn to *a lithographic apparatus comprising an illumination system for providing a projection beam of radiation, a support structure for supporting patterning means, a substrate table for holding a substrate, and a projection system for projecting the patterned beam onto a target portion of the substrate, the projection system comprising an objective having an optical element and having a holding device for an optical element in an objective having a mount that is connected to the objective with a reinforcing element between the mount and the optical element*.

Group XI, claim(s) 93 and 94-99, drawn to *an immersion lithography objective, wherein provided between an optical element subjected to a first immersion medium and an optical element arranged inside the lithography objective area feed line for a second immersion medium, and a removal line for the second immersion medium*.

2. The inventions listed as Groups I-XI do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. The special technical feature of the Group I invention is a seal or gasket is arranged between the optical element and the reinforcing element. The special technical feature of the Group II invention is the reinforcing element and the optical element are composed of the same material. The special technical feature of the Group III invention is the optical element and the reinforcing

element are connected to one another by a wrung connection. The special technical feature of the Group IV invention is the optical element and the reinforcing element are bonded together. The special technical feature of the Group V invention is a seal or gasket is arranged between the mount and the reinforcing element. The special technical feature of the Group VI invention is the reinforcing element is held inside the mount by an isostatic bearing. The special technical feature of the Group VII invention is the reinforcing element is fitted on the mount by a plurality of fastening elements. .

The special technical feature of the Group VIII invention is that the optical element is designed as a terminating element. The special technical feature of the Group IX invention is an objective having an optical element and having a holding device for an optical element. The special technical feature of the Group X invention is a lithographic apparatus comprising an illumination system for providing a projection beam of radiation, a support structure for supporting patterning means, a substrate table for holding a substrate, and a projection system for projecting the patterned beam onto a target portion of the substrate, the projection system comprising an objective. The special technical feature of the Group XI invention is an immersion lithography objective, wherein provided between an optical element subjected to a first immersion medium and an optical element arranged inside the lithography objective area feed line for a second immersion medium, and a removal line for the second immersion medium. Since none of the inventions of Groups I-XI share special technical features, unity of invention is lacking.

3. Lack of Unity of has been indicated between dependent claims. The examiner wishes to note that this is proper in light of the indicated Lack of Unity of the independent claims. See MPEP 1850: "If, however, an independent claim does not avoid the prior art, then the question whether there is still an inventive link between all the claims dependent on that claim needs to be carefully considered. If there is no link remaining, an objection of lack of unity *a posteriori* (that is, arising only after assessment of the prior art) may be raised."

Regarding claim 39, Schuster (US Patent No. 6,417,974, included in Applicant's IDS dated 5/19/2006) discloses a holding device for an optical element (last optical element 1, Figs. 1-6) in an objective (objection 10, Fig. 6) having a mount that is connected (Fig. 6, the mounts support the optical elements including optical element 2 and last optical element 1), on the one hand, to the objective (Fig. 6, the mounts are directly connecting the objective 10), and on the other hand, at least indirectly to the optical element (Fig. 6, last optical element 1 is connected to the mount through optical element 2), there being arranged between the mount and the optical element a reinforcing element (Figs. 1-6, optical element 1 reinforces last optical element 1) whose coefficient of thermal expansion corresponds substantially to the coefficient of thermal expansion of the optical element (col. 3, lines 44-49 and 64-67 and col. 4, lines 1-3, last optical element 1 and optical element 2 are made of materials with substantially corresponding thermal expansion).

Therefore, lack of unity is properly indicated between dependent claims since independent claim 39 does not avoid the prior art.

4. **Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christina Riddle whose telephone number is (571)270-7538. The examiner can normally be reached on Monday- Thursday 7:00-17:30 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diane Lee can be reached on (571)272-2399. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
